FORM

An HTML form is a section of a web page used to collect user input, which is then sent to a server for processing. Forms are created using the `<form>` element as a container for various interactive controls.

INPUT:

```html
<!DOCTYPE html>
<html>
<head>
    <title>Application Form</title>
</head>

<body>

    <h2>Job Application Form</h2>

    <form action="submit.php" method="post">

        <!-- Full Name -->
        <label for="fullname">Full Name:</label><br>
        <input type="text" id="fullname" name="fullname" required><br><br>

        <!-- Email -->
        <label for="email">Email:</label><br>
        <input type="email" id="email" name="email" required><br><br>

        <!-- Phone -->
        <label for="phone">Phone Number:</label><br>
        <input type="tel" id="phone" name="phone"><br><br>

        <!-- Gender -->
        <label>Gender:</label><br>
        <input type="radio" name="gender" value="Male"> Male
        <input type="radio" name="gender" value="Female"> Female
        <br><br>

        <!-- Position -->
        <label for="position">Position Applied For:</label><br>
        <select id="position" name="position">
            <option value="developer">Developer</option>
            <option value="designer">Designer</option>
            <option value="manager">Manager</option>
        </select><br><br>
```

```html
        <!-- Resume Upload -->
        <label for="resume">Upload Resume:</label><br>
        <input type="file" id="resume" name="resume"><br><br>

        <!-- Message -->
        <label for="message">Why should we hire you?</label><br>
        <textarea id="message" name="message" rows="4"
cols="40"></textarea><br><br>

        <!-- Submit Button -->
        <input type="submit" value="Submit Application">

    </form>

</body>
</html>
