ASSIGNMENT 7

In CSS, the **display** **property** controls the layout behavior and rendering box type of an element, while **padding** manages the space between an element's content and its border.

INPUT:

```html
<!DOCTYPE html>

<head>
    <meta charset="UTF-8">
    <title>Animals - CSS Display & Padding Example</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            margin: 20px;
            background-color: #f5f5f5;
        }

        h1, h2 {
            text-align: center;
        }

        /* BLOCK example */
        .block-animal {
            display: block;
            width: 200px;
            padding: 20px;
            background-color: lightblue;
            margin: 10px auto;
            text-align: center;
            border-radius: 10px;
        }

        /* INLINE example */
        .inline-animal {
            display: inline;
            background-color: pink;
            padding: 5px 10px;
            margin: 0 5px;
            border-radius: 5px;
        }

        /* INLINE-BLOCK example */
```

```
        .inline-block-animal {
            display: inline-block;
            width: 150px;
            height: 150px;
            padding: 10px;
            margin: 10px;
            background-color: lightgreen;
            text-align: center;
            border-radius: 10px;
        }

        .inline-block-animal img {
            width: 100px;
            height: 100px;
            border-radius: 50%;
        }

        /* FLEX example */
        .flex-container {
            display: flex;
            justify-content: center;
            gap: 20px;
            margin-top: 20px;
        }

        .flex-item {
            background-color: orange;
            padding: 20px;
            width: 150px;
            text-align: center;
            border-radius: 10px;
        }

        /* BUTTON with padding */
        .button {
            display: inline-block;
            padding: 10px 20px;
            background-color: blue;
            color: white;
            text-decoration: none;
            border-radius: 5px;
            margin-top: 20px;
        }
    </style>
</head>
```

```html
<body>
