JAVA OPERATORS

In Java, operators are special symbols that perform operations on variables and values. They are categorized into several types, including arithmetic, relational, logical, and assignment operators, which are fundamental for data manipulation and program control flow.

    <h1>JavaScript Operators & Conditional Statements</h1>

    <p id="result"></p>

    <script>
        // ===== OPERATORS EXAMPLES =====

        // Arithmetic Operators
        let a = 10;
        let b = 5;

        let addition = a + b;
        let multiplication = a * b;

        // Comparison Operator
        let isEqual = (a === b);

        // Logical Operator
        let checkLogical = (a > 5 && b < 10);

        // ===== CONDITIONAL STATEMENTS =====

        let message = "";

        // if...else statement
        if (a > b) {
            message += "a is greater than b <br>";
        } else {
            message += "b is greater than or equal to a <br>";
        }
```

```
        // if...else if...else
        if (a === b) {
            message += "a and b are equal <br>";
        } else if (a > b) {
            message += "a is bigger <br>";
        } else {
            message += "b is bigger <br>";
        }

        // switch statement
        let day = 2;
        switch(day) {
            case 1:
                message += "Monday <br>";
                break;
            case 2:
                message += "Tuesday <br>";
                break;
            default:
                message += "Another day <br>";
        }

        // Ternary Operator
        let result = (a > b) ? "Yes, a is greater" : "No, b is greater";

        // Display Results
        document.getElementById("result").innerHTML =
            "Addition: " + addition + "<br>" +
            "Multiplication: " + multiplication + "<br>" +
            "Are Equal: " + isEqual + "<br>" +
            "Logical Check: " + checkLogical + "<br><br>" +
            message +
            "<br>Ternary Result: " + result;

    </script>

</body>
</html>
```

OUTPUT:

JS Operators and Conditional St

File C:/Users/user/Desktop/HTML/Javascript/java%20operators/java/java%20operators.html

JavaScript Operators & Conditional Statements

Addition: 15
Multiplication: 50
Are Equal: false
Logical Check: true

a is greater than b
a is bigger
Tuesday

Ternary Result: Yes, a is greater
